The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. Continuation of 11. does NOT place the application in condition for allowance because:

Applicant argues that Moresco fails to disclose the arrangement of the first group of I/O cells and the second group of IO cells which satisfy the claim criteria of:

1. a first group of I/O Cells and another portion of I/O cells forming a second group disposed on an inner position, i.e. the second group being surrounded by the first group
2. the first group including a plurality of rows disposed to encircle a center of the mounting member
3. the second group including a plurality of rows disposed to encircle the mounting member.

Applicant further asserts that Moresco's "diamond" configuration of Fig 14 only satisfies criteria 2 and 3.

The Examiner notes that the diamond configuration of Fig 14 satisfies all of the claimed criteria including point 1. For example, when the second group is considered as the portion of the black power cells in a diamond with 5 pads per side and the first group is considered as the white ground pads with 5 pads per side on the diamond, the second group is disposed on an inner position with respect to the first group. Further, the fact that a portion of the black power cells is disposed outside of the white ground pads does not compromise the fact that a second group of I/O cells exists within a first group of I/O cells.

The examiner additionally notes that the term "row" can be interpreted as one side of each of the groups of cells. For instance, Moresco can be interpreted as having the second group (considered as the portion of the black power cells in a diamond with 5 pads per side) where each side of the diamond shape constitutes a row, therefore there are would be 4 rows of 5 pads. The claim language does not require the specific arrangement of the rows of each group in relation to one another.

Finally, the examiner notes this is just one interpretation of how Figure 14 reads on the claim language and that Moresco's arrangements in Figure 14 can be interpreted in other manners.

Accordingly the claims 1-11 stand rejected as presented in the Final Office Action mailed 04/28/2009.
